This License is valid only for the specific region or specific hunt area as designated by the successful bidder/raffle winner at the time of application. In addition, once the Commissioner License is issued the specific region or specific hunt area shall not be changed. The Elk areas 75 and 79, which are located within Grand Teton National Park, also require a Special Park Permit issued by the US Park Service in addition to a Wyoming Game and Fish elk hunting license. Elk hunting licenses cannot be utilized in these areas without this Park Permit. Their Park Permits are only issued on the basis of receiving an elk license through the Game and Fish Department's limited quota drawings. These licenses are not issued through a limited quota drawing; therefore, applicants should not bid on a Commissioner license if their intent is to hunt elk in Grand Teton National Park.
